

CLIMATE INSIGHT

Drop-In Q&A Session

LAND ACKNOWLEDGEMENT

Reconciliation is a fundamental component to building equitable, net-zero, and climate-resilient communities.

We respectfully acknowledge that ICLEI Canada's work happens across Turtle Island which has traditionally been and is home to many diverse First Nations, Inuit, and Métis peoples since time immemorial. We are committed to strengthening relationships with Indigenous groups and knowledge keepers, knowing that reconciliation requires ongoing learning, unlearning, reflection, and action. We endeavour to listen to and learn from Indigenous Peoples on an ongoing basis in the process of our work.

THE BASICS: GET TO KNOW CLIMATE INSIGHT

Climate Insight is the go-to destination for relevant, actionable data and information on building low-carbon, resilient housing and infrastructure. It is composed of three main pillars:

- **Map:** Explore climate, socio-economic, and infrastructure data as map layers in your community.
- **Solutions Finder:** Answer questions to receive curated solutions for low-carbon, resilient housing and infrastructure tailored to your needs.
- **Library:** Find resources, tools, case studies, infrastructure options, information on relevant codes and standards, and more to build low-carbon, resilient housing and infrastructure.

WHAT'S NEW: LATEST CLIMATE INSIGHT UPDATES

With user feedback at the heart of the process, the platform functionality, features, and content is continuously being updated to better serve communities as they confront the growing challenges of climate change.

WHAT'S NEW IN RELEASE II

Updated Solutions Finder

Answer a series of questions about your community and the climate risks you are working to address. Based on your answers, the Solutions Finder will not only curate a list of infrastructure options tailored to your context, but can now **rank these based on their relevance to you.**

WHAT'S NEW IN RELEASE II

Map

Make use of new layers—including additional social vulnerability data—that make the Map even more robust.

Improved Search Function

Find what you need faster with an improved search function.

+100 New Content Cards

New content is added to Climate Insight monthly, but last week saw the addition of 100 new content cards.

WHAT'S COMING NEXT

Climate Insight is informed by the needs of housing and infrastructure professionals. Here's what you can look forward to in 2025:

- A **Rapid Risk Assessment Tool** that serves an easy-to-use high level screening tool to understand climate risk for various infrastructure assets.
- A new way to see and interpret hazards at the geospatial scale through the development of **hazard profiles**.
- Additional **map layers** related to energy poverty.
- A special release dedicated to **housing**, including infrastructure options, codes & standards, and case studies that directly support municipalities in building climate-ready housing.

Be part of the conversation. Fill in the Climate Insight survey to help us ensure that the platform continues to best serve the needs of housing and infrastructure practitioners like you.

THANK YOU
